Contents of Volume 55 (2001)

Volume 55 No. 1 January 2001

Publisher's Note v

DIMA MOZYRSKY / Exactly Solvable Model of a Two-Level Quantum System Interacting with Spin Environment 1–8

S. A. ALBEVERIO, P. EXNER and V. A. GEYLER / Geometric Phase Related to Point-Interaction Transport on a Magnetic Lobachevsky Plane 9–16

PARTHA GUHA / Diff(S^1) and Adler–Gelfand–Dikii Spaces and Integrable Systems 17–31

DIDIER ARNAL and NABIHA BEN AMAR / q-Relative Star Products 33–42

PEKKA LAHTI, MACIEJ MĄCZYNSKI and KARI YLINEN / Unitary and Antiunitary Operators Mapping Vectors to Parallel or to Orthogonal Ones, with Applications to Symmetry Transformations 43–51

VOLKER BACH and OLIVER MATTE / Exponential Decay of Eigenfunctions of the Bethe–Salpeter Operator 53–62

M.W.WALSER and C. H. KEITEL / Geometric and Algebraic Approach to Classical Dynamics of a Particle with Spin 63–70

S. MOGHIMI-ARAGHI, S. ROUHANI and M. SAADAT / Current Algebra Associated with Logarithmic Conformal Field Theories 71–76

P. P. KULISH and N. MANOJLOVIĆ / Bethe Vectors of the osp(1|2) Gaudin Model 77–95

Volume 55 No. 2 February 2001

E. YU. LERNER and M. D. MISSAROV / Singularities of Adelic Feynman Amplitudes 97–111

FABIEN BESNARD / Number Operator Algebras and Deformations of ε-Poisson Algebras 113–125

ANDRZEJ SITARZ / More Noncommutative 4-Spheres 127–131

CHRISTIAN HAINZL and ROBERT SEIRINGER / Bounds on One-Dimensional Exchange Energies with Application to Lowest Landau Band Quantum Mechanics 133–142

L. A. FERREIRA and A. V. RAZUMOV / Hopf Solitons and Area-Preserving Diffeomorphisms of the Sphere 143–148

FRIEDEMANN BRANDT / Jet Coordinates for Local BRST Cohomology 149–159

HARALD GROSSE and KARL-GEORG SCHLESINGER / A Suggestion for an Integrability Notion for Two-Dimensional Spin Systems 161–167

JÉRÔME GERMONI / On the Classification of Admissible Representations of the Virasoro Algebra 169–177

Volume 55 No. 3 March 2001

Special Issue on

TOPOLOGICAL AND GEOMETRICAL METHODS
Applications in Dynamic Systems, Physics, Chemistry and Biology

Edited by

J. M. GAMBAUDO and H. R. JAUSLIN
Centre de Dynamique des Systèmes Complexes, Université de Bourgogne, Dijon, France

J. M. GAMBAUDO and H. R. JAUSLIN / Preface 179

MITCHELL A. BERGER / Topological Invariants in Braid Theory 181–192

R. GHRIST / Steady Nonintegrable High-Dimensional Fluids 193–204

VŨ NGOC SAN / Quantum Monodromy and Bohr–Sommerfeld Rules 205–217

FRÉDÉRIC FAURE and BORIS ZHILINSKII / Topologicl Properties of the Born–Oppenheimer Approximation and Implications for the Exact Spectrum 219–238

AKOS DOBAY, PIERRE-EDOUARD SOTTAS, JACQUES DUBOCHET and ANDREZEJ STASIAK / Predicting Optimal Lengths of Random Knots 239–247
